What power supply does China use?

China operates on a 220V power supply at 50Hz and uses three primary plug types: A, C, and I. Proper preparation with the right adapters will ensure a smooth experience with your electronic devices. In mainland China, the power supplied to sockets is 220 volts at 50Hz AC.

Do I need a power converter to travel to China?

This means that you typically won't have to buy any special adapter or power converter for your travel to China. However, it is essential to check the specifications on your device's charger. If your device is rated for 220V or 240V, it will work fine in China. However, if it is only rated for 110V, you will need a voltage converter.

Do travel adapters work in China?

Travel adapters are essential tools for plugging foreign devices into Chinese outlets. While adapters adjust the plug shape to fit, they do not convert voltage. If your device is not compatible with China's 220V supply, you'll need a voltage converter. Travel adapters can be readily purchased in the US from various stores and online platforms.

Do Asian countries use 220/240 volt electricity?

Asian countries all run on 220/240 volt electricity. This means that if you're coming from the Americas or another 110/120 volt country, your appliances and electronics are not compatible with the voltage used in Asia.

Can I use a wall plug adapter in China?

Electrical devices are hair dryers, irons, electric shavers and similar items. Nearly all of your electronics will work just fine in China with an adapter. Just to make sure, check the black AC adapter box on the device and ensure the input reads 100V-240V. If it does, you can use it all around the world with a wall plug adapter.

How do I know if my power supply is international?

There's also a built-in contact tag so you can easily identify your belongings. What's the electricity and power supply like Internationally? This will vary from place to place, but the two main voltages in the world are 110V and 220V. You will want to check your appliances and confirm if they are multi-voltage.
