How do I choose a battery pack for outdoor use?

When shopping for a battery pack to use in the outdoors, look for one that is durable, protected from the elements, and provides enough energy for the length of your outing. Goal Zero's line of portable battery packs was built from the ground up for use in the outdoors.

What is a battery pack?

A battery pack is a portable power source designed to keep your devices operational. These charging options come in various sizes, from tiny packs for mobile devices to portable power stations that can power laptops, radios, and even small appliances.

Which battery is best for a portable power station?

These days most portable power stations, including all those we recommend here, use LiFePO4 batteries, which are capable of holding far more cycles, which is the number of times a battery goes through a complete discharge and recharge, than older lithium-ion batteries while also being less likely to combust.

Can you carry a portable power station on an aircraft?

The battery capacities on these devices are generally so high that they can't legally be carried onboard an aircraft without getting permission from the airlines first. The largest and heaviest of the outdoor charging solutions, portable power stations are truly in a class all their own.

Do you need a USB battery pack for camping?

Keeping your gadgets charged in the backcountry requires a higher level of durability and protection from the elements than a typical USB battery pack. You'll need a battery pack designed for outdoor use, with enough ports and capacity to power smartphones, tablets, GPS devices, lights, and other gear.

What can a portable power station power?

Portable power stations can power laptops, radios, and even small appliances while on an extended expedition to some far flung destination. These charging options come in the form of tiny battery packs designed to keep a mobile device operational for a few extra days to portable power stations.
