Why do we support the construction of Ulaanbaatar's first metro?

We support the construction of Ulaanbaatar's first metro, and focus on transparently communicating the progress of the project, traffic coordination, and the positive impact it will have on citizens. We respect citizens' opinions, work together, build trust, and strive to minimize inconvenience.

What is Ulaanbaatar Metro PMC?

Ulaanbaatar Metro PMC is an organization that aims to improve the quality of life of citizens and contribute to sustainable development. We support the construction of Ulaanbaatar's first metro, and focus on transparently communicating the progress of the project, traffic coordination, and the positive impact it will have on citizens.

How many 4G base stations are there in China?

Back in December last year, Global Times reported, there are currently approximately 6 million 4G base stations worldwide, more than half of which are in China and about 300,000 in the US. Why does China have so many base stations? This is because of a nation-level project in China in 2003.

Why is Ulaanbaatar the heart of Mongolia?

The city of Ulaanbaatar, an important city that serves as the "heart of Mongolia" has experienced rapid urbanization with 49.5% of Mongolia's population and 56% of registered vehicles concentrated there. As a result, severe traffic congestion and air pollution that is fatal to citizens' health are worsening.

How will Ulaanbaatar's population change in 2045?

The concentration of population in Ulaanbaatar is expected to continue in the future, with the current population (1.6 million) expected to increase by about 57% by 2045. Reducing travel time for citizens through smooth traffic flow made possible by reduced traffic congestion

How many DoCoMo base stations are there in 2021?

In an earlier post on NTT Docomo, we pointed out that Docomo coverage is forecast to increase from 500 base stations in 150 locations to 10,000 sites (in about 500 cities) by June 2021 and 20,000 by March 2022. According to Tefficient, Rakuten had 5739 LTE base stations on air at the end of June.
