Is the Maldives ready for 5G?

With commercial 5G services already launched and fibre networks rapidly expanding around the country, the Maldives is primed to deliver world-class telecommunications services to its domestic and international customers.

Which telco is deploying 5G technology in Maldives?

Ooredoo is deploying Huawei's 5G SingleRAN radio system with Massive MIMO technology, along with its 5G Cloud Core solution. The Maldives' other major telco and mobile operator, Dhiraagu, trialled 5G technology as far back as 2018.

Is the Maldives' telecom sector showing signs of recovery?

The Maldives' telecom sector starts to show signs of recovery after being pummelled by the Covid-19 crisis. Ooredoo Maldives launches the Maldives' first commercial 5G mobile service in Greater Male. The Maldives-Sri Lanka (MSC) cable system is lit, less than a year after construction began.

Is the Maldives' telecoms market overweight?

The Maldives' telecoms market is experiencing a similar level of pain because of the pandemic, due to being overweight in the mobile segment. That is because, historically, the country's high number of tourists and expatriate workers has inflated the penetration rate for mobile services, making it one of the highest in the world.

What is Ooredoo 5G?

Ooredoo 5G delivers download speeds of up to 1Gb/s. The launch followed the announcement in March 2020 by the telco's parent company, Qatar-based Ooredoo Group, of a partnership with Huawei to upgrade its mobile networks to 5G in five of the countries where it currently operates - Kuwait, Oman, Indonesia, Tunisia, and the Maldives.

What happened to Maldives' tourism?

The country had a relatively short period of lockdown and was willing to welcome visitors back as early as July 2020. But the effective shutdown of international air travel for most of the year resulted in the bottom falling out of the Maldives' tourism industry, taking GDP down 32% in the process.

China Mobile was the first to build a large-scale 5G network, with approximately 2.4 million 5G base stations,
