Where is India's largest battery energy storage system located?

New Delhi: In a significant leap towards green energy and uninterrupted power supply, Delhi's Power minister Ashish Sood Thursday inaugurated India's first commercially approved and South Asia's largest utility-scale standalone Battery Energy Storage System (BESS) at the 33/11 kV Kilokri substation in South Delhi.

Will India's first battery energy storage system be regulated in 2024?

New Delhi | 08 May 2024 -- In a significant step forward for India's energy transition, the Delhi Electricity Regulatory Commission (DERC) has granted regulatory approval of India's first commercial standalone Battery Energy Storage System (BESS) project.

Who commissioned India's first standalone battery energy storage system?

India's first commercial standalone battery energy storage system (BESS) project with a 20MW/40MWh capacity at the distribution company level and a tariff approved by the electricity regulatory authority has been commissioned by power sector infrastructure investment trust IndiGrid in Delhi.

What is India's energy storage capacity?

India's total BESS capacity reached 219.1 MWh as of March 2024, according to Mercom India Research's report, India's Energy Storage Landscape.

Why is indigrid launching a commercial battery storage project?

Marking IndiGrid's entry into commercial battery storage, this milestone project represents a pivotal moment in India's energy transition. The BESS installation is engineered to support renewable energy integration into the distribution grid, enhance grid stability, manage peak demand, and fulfill ancillary power system needs.

Which energy storage solutions provider has commissioned BSES Rajdhani kilokari substation?

AmpereHour Energy, a full-stack energy storage solutions provider, in consortium with Indigrid, has commissioned BSES Rajdhani Power Ltd's (BRPL) 20 MW/40 MWh battery energy storage system (BESS) project at the BSES Rajdhani Kilokari Substation in Delhi.
