When will a large-scale energy storage system be installed in Central Visayas?

The project is slated for commissioning in the first half of 2026 and is expected to be one of the first large-scale energy storage systems in Central Visayas, the company said in a media release on Monday.

What is a hybrid energy storage system in Central Visayas?

Considered one of the first large-scale energy storage systems in Central Visayas, the hybrid BESS will provide ancillary services by storing surplus electricity and releasing it to the grid when needed to help stabilize power supply.

When will the Visayas energy project start?

The project broke ground on Thursday, July 17, and is scheduled for commissioning by the first half of 2026. It is expected to enhance energy reliability in the Visayas grid and support the region's continued economic expansion.

How important is energy storage in 2031?

According to the Department of Energy, the share of variable renewable energy like solar and wind could rise to as much as 28 percent by 2031. In this context, energy storage systems like BESS will be essential for managing fluctuations and ensuring reliable delivery of power.

Is a coal-fired power plant a good investment in the Visayas?

In the Visayas, coal-fired power plants such as AboitizPower's Therma Visayas Inc. (TVI) still contributes to the region's generation mix, helping maintain grid stability as renewable integration increases. According to the Department of Energy, the share of variable renewable energy like solar and wind could rise to as much as 28 percent by 2031.

Pasig City, Philippines -- 21 July 2025 - Meralco PowerGen Corporation (MGEN) is set to develop a 49-megawatt (MW) Battery Energy Storage System (BESS) in Toledo, ...

Acciona Energia Global, a leading renewable energy producer, started the construction of a P7.5-billion solar project in Daanbantayan, Cebu, following a groundbreaking ...
