What is AES Dominicana - battery energy storage system?

The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The project was commissioned in 2017. The AES Dominicana Andres - Battery Energy Storage System was developed by Fundacion AES Dominicana. The project is owned by The AES (100%).

Does Santo Domingo need a power plant?

The steady flow of electricity can support both tourism and Santo Domingo's innovative start-up scene. Nobel literature laureate Mario Vargas Llosa described the Dominican "appetite for noise" in his book *The Feast of the Goat*. A city that's already pulsating doesn't need any extra noise from a power plant.

Could a water-based power plant benefit Santo Domingo?

A water-based power plant could be one very valuable asset. Estrella del Mar III offers a host of benefits to the people of lively Santo Domingo, with a more reliable energy supply, reduced LCoE (levelized cost of electricity), and less noise--residential housing is close to the power plant.

Where is Santo Domingo located?

The Dominican Republic capital of Santo Domingo sits at the mouth of the Ozama River. It is one of the Caribbean's oldest cities, and with 3.3 million inhabitants, it's also the most populous. Over the past decade alone, this burgeoning, bustling melting pot has added around 700,000 inhabitants.

Is Santo Domingo under water?

With 1,600km of sandy coastline, national parks and dramatic mountain ranges, the Dominican Republic is the most popular tourist destination in the Caribbean. Santo Domingo, however, is also among the world's cities that are most at risk of rising sea levels caused by climate change. By 2050, parts of the city could be under water.

What is a combined cycle power plant in Santo Domingo?

The combined cycle power plant has arrived in Santo Domingo. Watch video In rapidly growing cities, SeaFloat is a pioneering solution that ensures a reliable supply of power without taking up space on land. A growing population needs an efficient, reliable and affordable supply of power--now, and for the future.
