What are PV solar cell glass price developments?

This post is a summary of the PV solar cell glass price developments. The price developments of PV solar cell glass are expressed in US\$ prices converted FX rates applicable at the time when the price was valid. PV solar cell glass price index developments are calculated from multiple separate sources of data to ensure statistical accuracy.

How much does solar glass cost in China?

The average price of 2.0 mm solar glass increased CNY1 to CNY 13.5 per square meter, up 8% from last week. Meanwhile, 3.2 mm solar glass climbed CNY 2 to CNY 22.5 per square meter, a 9.8% rise. Xinyi Solar has reported CNY 21.92 billion of full-year revenue for 2024, down 9% year on year.

Will China's photovoltaic industry 'limit production and stabilize prices'?

The China Photovoltaic Industry Association (CPIA) reportedly proposed a campaign to "limit production and stabilize prices" recently, aimed at mitigating the effects of cutthroat price competition and market disorder.

How much does polysilicon cost?

The highest price was recorded at 35.360 yuan/kg for June 2026 delivery. While this marks the highest price for that contract since its debut two weeks ago, sources note that it still falls below the production costs of most polysilicon manufacturers.

Will China's photovoltaic market plunge 85% in June 2025?

If full-year installations align with the China Photovoltaic Industry Association's forecast of 215-255 GW, down from 277.2 GW in 2024, this could imply a year-on-year plunge of up to 85% in installations in June 2025 onwards, the analyst added. Reflecting the weaker outlook, the TOPCon module forward curve is in backwardation.

Will pricing pressure persist in the polysilicon market?

This suggests that pricing pressure in the polysilicon market is likely to persist for at least another year. As July begins, trading volume for polysilicon futures contracts scheduled for July delivery has shown a marked decline.

The high inventory levels pose a challenge to the de-stocking efforts, resulting in difficulties for photovoltaic glass prices to rebound. Currently, PV glass prices have stabilized, ...

Weekly price of photovoltaic glass

The price of photovoltaic glass is running at a low level, and the inventory inflection point is approaching. According to Zhuochuang information, this week's 3.2mm coated ...

Project name: Annual output of 500,000 tons of photovoltaic glass production line project. Project construction location: in Khalifa Industrial Park Free Trade Zone (KIZAD), Abu ...

Cinda Securities predicts that the price range of 3.2mm and 2.0mm PV glass in 2021 will be between 30-35 yuan/m² and 25-30 yuan/m² respectively. Some analysts believe ...

Although prices were flat week-over-week in CW23, the broader downtrend remains evident. Most n-type products continue to decline across the value chain, with just 3 of the 25 ...

Calculation Rules Weekly price: It is the arithmetic mean of the prices published in a natural week, updated at 24:00 each Saturday. The calculation cycle is from last Sunday to the following ...

All categories of the TaiyangNews PV Price Index, barring solar glass, saw negative price developments in Calendar Week 19. Granular silicon ...

Per data from the China Nonferrous Metals Industry Association, solar-grade polysilicon prices increased 0.87% week-on-week. This represents a modest but rare price ...

The TaiyangNews PV Price Index carried some of its momentum from CW29 into Calendar Week 30, with price increases in 3 of the 5 tracked categories.

This week, the domestic PV glass market has witnessed sluggish overall turnover, leading to downward pressure on local prices. During negotiations for new orders, some ...

This week, the latest price for N-type 182 monocrystalline silicon wafers is 1.02 RMB per piece, down from 1.05 RMB per piece last week, indicating a decline of 2.86%. On ...

Prices for cells and PV glass, both of which remain high in Q4, are rising every month, and exchange rates are varying wildly. This double whammy struck module makers in ...

Solar glass prices continued to climb this week, with 2.0 mm sheets rising 8% to CNY 13.5 (\$1.85) per square meter and 3.2 mm sheets up 9.8% to CNY 22.5, according to the China Nonferrous ...

Solar glass prices were flat in CW28, following a week of steep declines. Calendar Year 2025 is seeing a gradual phase-out of p-type products. While a few new products have ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...
